

Directions:

1. Place the QUADSis. Fit Tool on the floor with the U shaped marker up against a wall. Place your heel at the bottom of the page inside the U shaped heel marker line.

2. Your actual foot size is where a line with the corresponding size is listed. The line should be just above your big toe. If you are close to a line it may be most comfortable to order the next size up.

3. Make sure to measure both feet. (Fun Fact: Often one foot is slightly larger than the other!)

4. Order your QUADSis. shoes today at www.shopquads.com !
