

**Directions:**

1. Print The QUADSis™ Fit Tool at 100%/Fit to Paper and check its accuracy by placing a credit card or quarter in the designated spaces.

2. Place the QUADSis™ Fit Tool on the floor with the U shaped marker up against a wall. Place your heel at the bottom of the page inside the U shaped heel marker line.

3. Your actual foot size is where a line with the corresponding size is listed. The line should be just above your big toe. If you are close to a line it may be most comfortable to order the next size up.

4. Make sure to measure both feet. (Fun Fact: Often one foot is slightly larger than the other!)

5. Order your QUADSis™ shoes today!
